

ODISHA NURSES AND MIDWIVES EXAMINATION BOARD

ENTRANCE EXAMINATION
PB DIPLOMA NURSING 2023

Time 3 hours

Full Mark – 600

Answer all questions on the OMR Answer sheet provided.
Do not answer / write on the question booklet.

INSTRUCTIONS

1. This is the Question Booklet containing 150 multiple choice questions.
2. Do not answer on this Question Booklet.
3. Do not write name or roll number on this booklet.
4. A separate answer sheet (OMR) is provided.
5. Write the roll no, name and institution name in the OMR sheet as instructed.
6. Each question has four choices out of which only one is correct.
7. Answer the correct choice in the OMR sheet.
8. Each correct answer carries FOUR marks
9. At the end of examination submit the Question Booklet along with the OMR sheet to the invigilator.
10. Use only black ball point pen to answer the OMR sheet.
11. Malpractice of any nature is strictly prohibited and if found the answer sheet shall be scratched.

CHAIRMAN ONMEB

12/11/23
31.8.23

1. The first part of the report deals with the general situation of the country.

2. The second part of the report deals with the economic situation of the country.

3. The third part of the report deals with the social situation of the country.

4. The fourth part of the report deals with the political situation of the country.

5. The fifth part of the report deals with the cultural situation of the country.

6. The sixth part of the report deals with the environmental situation of the country.

7. The seventh part of the report deals with the international situation of the country.

8. The eighth part of the report deals with the future prospects of the country.

9. The ninth part of the report deals with the conclusion of the report.

10. The tenth part of the report deals with the appendix of the report.

11. The eleventh part of the report deals with the bibliography of the report.

12. The twelfth part of the report deals with the index of the report.

13. The thirteenth part of the report deals with the list of figures of the report.

14. The fourteenth part of the report deals with the list of tables of the report.

15. The fifteenth part of the report deals with the list of references of the report.

16. The sixteenth part of the report deals with the list of abbreviations of the report.

17. The seventeenth part of the report deals with the list of symbols of the report.

18. The eighteenth part of the report deals with the list of units of the report.

QUESTIONS

1. Microblastic anemia is due to deficiency of
 - a) Vitamin B12
 - b) Folic acid
 - c) Iron
 - d) All of the above
2. Which is a ball & socket joint
 - e) Ankle joint
 - f) Shoulder joint
 - g) Carpal joint
 - h) Elbow joint
3. Temporary arrest of breathing is called as
 - a) Apnea
 - b) Eupnoea
 - c) Dyspnea
 - d) Orthopnea
4. The blood brain barrier of brain is formed by
 - a) Astrocyte
 - b) Dendrocytes
 - c) Neurolemmocytes
 - d) Lymphocytes
5. A player is found to have a resting cardiac output of 5.0 lit/mm and a heart rate of 50 beats/mm. What is her stroke volume?
 - a) 10 ml
 - b) 100 ml
 - c) 1000 ml
 - d) 2500 ml

6. Which of the following glands is an example of holocrine gland ?
 - a) Sweat gland
 - b) Pancreatic gland
 - c) Sebaceous gland
 - d) Salivary gland
7. Maternal antibodies are present in the newborn against all of the following disease's except
 - a) Diphtheria
 - b) Tetanus
 - c) Pertussis
 - d) Measles
8. Vision 2020 "The right to sight" includes all except
 - a) Trachoma
 - b) Epidemic conjunctivitis
 - c) Cataract
 - d) Onchocerciasis
9. The following is true about prevalence and incidence
 - a) Both are rates
 - b) Prevalence is a rate but incidence is not
 - c) Incidence is a rate but prevalence is not
 - d) Both are not rate
10. Study of time, place & person is called as
 - a) Experimental epidemiology
 - b) Analytical epidemiology
 - c) Descriptive epidemiology
 - d) Randomized control trial
11. Commonest complication of mumps is
 - a) Orchitis and Oophoritis
 - b) Pneumonia
 - c) Encephalitis
 - d) Myocarditis

- 12.Orthotolidine test is used to determine
- a) Nitrates in water
 - b) Free & combined chlorine in water
 - c) Ammonia content in water
 - d) Fluoride in water
- 13.An upper limit of noise which people can tolerate without sub damage to their hearing is
- a) 45 dB
 - b) 85 dB
 - c) 65 dB
 - d) 105 Db
- 14.Papilledema is caused by intoxication of
- a) Vitamin A
 - b) Vitamin D
 - c) Vitamin E
 - d) Vitamin B
- 15.The main aim of micro-teaching is
- a) Effective teaching
 - b) Developing specific skills
 - c) Seeking feedback
 - d) Teach a small topic
- 16.The record which shows the progress of the student throughout the academic programme is
- a) Anecdotal records
 - b) Academic records
 - c) Cumulative records
 - d) Observation records
- 17.The principal tool of performance evaluation is
- a) Check list
 - b) Direct observation
 - c) Rating scale
 - d) Anecdotal record

18. Which among the following is not a component of curriculum

- a) Objectives
- b) Content
- c) Syllabus
- d) Evaluation

19. Half-life ($t_{1/2}$) doesn't depend on

- a) Bio-transformation
- b) Time of drug absorption
- c) Concentration of drug in plasma
- d) Rate of drug elimination

20. Which of the local anesthetic is called a universal anesthetic

- a) Lidocaine
- b) Procaine
- c) Ropivacaine
- d) Bupivacaine

21. Which neuromuscular blocking agent is contraindicated in patient with glaucoma

- a) Tubocurarine
- b) Pancuronium
- c) Succinylcholine
- d) Gallamine

22. In a normal distribution curve, which of the following is true

- a) Mean = median
- b) Mean = SD
- c) Mean = variance
- d) Mean = 2 x SD

23. Incidence study is also called as

- a) Case control
- b) Cohort
- c) Grounded theory
- d) RCT

24. Reasoning from the general to specific is called
- a) Deduction
 - b) Induction
 - c) Observation
 - d) Participation
25. Which of the following is not a step of the quantitative research process
- a) Foundation of research problem
 - b) Review of literature
 - c) Formulation of hypothesis
 - d) Met-analysis of research study
26. The most appropriate initial goal for a client diagnosed with bulimia is to
- a) Avoid shopping for large amount of food
 - b) Control eating impulses
 - c) Identify anxiety-causing situations
 - d) Eat only three meals per day
27. A male client is admitted to the substance abuse unit for alcohol; detoxification. Which of the following medication is nurse most likely to administer to reduce the symptoms of alcohol withdrawal
- a) Naloxone (Narcan)
 - b) Haloperidol (Haldol)
 - c) Magnesium sulfate
 - d) Chlordiazepoxide
28. A client tells a nurse "Everyone would be better off I wasn't alive". Which nursing diagnosis would be made based on this statement
- a) Disturbed thought process
 - b) In-effective coping
 - c) Risk of self-directed violence
 - d) Impaired social interaction
29. Arun, who has had auditory hallucinations for many years, tells NO that the voices prevent his participation in a social skills training program at the community health center. Which intervention is appropriate
- a) Analyze the content of voices
 - b) Participate in the program when the voices cease
 - c) Take his medication as prescribed
 - d) Use thought-stopping techniques

30. When performing a physical examination on an infant, the nurse in-charge notes abnormally low-set ears. This finding is associated with
- Autogenous tetanus
 - Tracheoesophageal fistula
 - Congenital heart defects
 - Renal anomalies or MR(Mental Retardation)
31. A child is diagnosed with Wilms' tumor. During the assessment, the NO expect to detect
- A gross hematuria
 - Dysuria
 - Nausea and vomiting
 - An abdominal mass
32. Which of the following organisms is responsible for the development of rheumatic fever
- Streptococcal pneumonia
 - Hemophilus influenza
 - Group-A beta-hemolytic streptococcus
 - Staphylococcus aureus
33. Building a tower of 6 cubes by 22-month-old requires
- Visual motor coordination
 - Ability uses objects in combination
 - Visual, gross and fine motor co-ordination
 - Able to think actions to solve problem
34. The most common cause of sleeping difficulties in the first 2 months of life is
- Gastro-esophageal reflux
 - Formula intolerance
 - Colic
 - Developmentally sleeping behavior
35. Drug that cause expulsion of gas from intestinal tract
- Astringent
 - Carminatives
 - Cathartics
 - Emetics

36.1 gallon is equal to

- a) 2000 ml
- b) 3000 ml
- c) 4000 ml
- d) 5000 ml

37.Hot test is used to detect which of the following in urine

- a) Bile
- b) Albumin
- c) Sugar
- d) Acetone

38.Which of the following ethical principles refers to the duty no to harm

- a) Beneficence
- b) Non maleficence
- c) Fidelity
- d) Veracity

39.Skin breaks, abrasion, blister, or shallow crater, edema and infection are characteristics of

- a) Stage - I pressure ulcer
- b) Stage - II pressure ulcer
- c) Stage - III pressure ulcer
- d) Stage - IV pressure ulcer

40.Which of the following is not considered as meta-paradigm of nursing

- a) Person
- b) Environment
- c) Health
- d) Diagnosing

41.Which of the following clinical finding indicates the patient is experiencing hypokalemia

- a) Edema
- b) Muscle spasm
- c) Kussmaul breathing
- d) Abdominal distention

42. Fundal height of pregnant woman is measured from
- The top of the pubic bone to the middle of the uterus
 - The top of the pubic bone to the top of the uterus
 - The middle of the pubic bone to the bottom of the uterus
 - The bottom of the pubic bone to the top of the uterus
43. Sarah is 17 yrs old female who has not gotten her first period and is visiting her doctor for an exam. She has displayed the normal growth and development of several secondary sex characteristics. The nursing officer would describe to the doctor that Sarah is showing signs of
- Primary amenorrhea
 - Primary dysmenorrhea
 - Secondary dysmenorrhea
 - Oligomenorrhoea
44. The umbilical cord otherwise is known as
- Funis
 - Fallopian tube
 - U-Cord
 - Placenta
45. The nurse has just completed emergency delivery of a term infant. What is the priority nursing concern at this time
- Controlling hemorrhage in mother
 - Removing the afterbirth
 - Keeping the infant warm
 - Cutting the umbilical cord
46. Laparoscopic tubal ligation contradiction
- Postpartum state
 - Post MTP state
 - Gynecological malignancies
 - 3 previous child birth
47. Tocolytic can be given in
- Placenta previa
 - Placenta abrupt
 - Pre-term labor
 - PIH

48. A woman is admitted with suspected placenta previa. What test does the nurse expect will be done to confirm the diagnosis
- a) Internal exam
 - b) Nonstress test
 - c) Oxytocin challenge test
 - d) Ultrasound
49. MgSO_4 is ordered for a client who is hospitalized for PIH. What effects would the nurse expect to see as a result of this medication
- a) CNS depression
 - b) Decreased gastric activity
 - c) Onset of contraction
 - d) Decrease of bowel movement
50. Which of the following device is required for cardiac bed
- a) Firm mattress
 - b) Fracture boards
 - c) Bed cradle
 - d) Back rest
51. For taking temperature orally, the glass thermometer should be placed under tongue for how many duration
- a) 3 to 5 mins
 - b) 1 to 2 mins
 - c) 1 to 5 mins
 - d) Upto 2 mins
52. Which bath is advisable for the client who has undergone rectal surgery
- a) Hot bath
 - b) Sitz bath
 - c) Warm bath
 - d) Electric bath
53. Abscess formation is a common complication of which type of injection
- a) Intramuscular injection
 - b) Intravenous injection
 - c) Subcutaneous injection
 - d) Intradermal injection

54. Which substance is not normally found in urine analysis

- a) Urea
- b) Albumin
- c) Uric acid
- d) Creatinine

55. Which type of enema is helpful in expelling flatus from the rectum & provide relief from gaseous distention

- a) Oil retention enema
- b) Carminative enema
- c) Nutritive enema
- d) Medicated enema

56. Wernick's encephalopathy is a deficiency disorder of which vitamin

- a) Riboflavin
- b) Niacin
- c) Thiamine
- d) Pyridoxine

57. An adult woman requires iron in value of

- a) 24 mg
- b) 32 mg
- c) 40 mg
- d) 100 mg

58. Crippling disease is due to excessive intake of which trace element

- a) Copper
- b) Magnesium
- c) Fluorine
- d) Iodine

59. Which is not a characteristic of good meat

- a) The colour is pale pink or deep purple
- b) The meat should be firm and elastic to touch
- c) The odor is agreeable
- d) The colour is pink or red

60. Method of cooking below the boiling point i.e, about 84°C is called as
- a) Stewing
 - b) Steaming
 - c) Baking
 - d) Simmering
61. The Government of India enacted a central prevention of food adulteration act in the year
- a) 1976
 - b) 1954
 - c) 1967
 - d) 1974
62. The autoclave method of sterilization the employed pressure and temperature of water is
- a) 5 lb/inch² at 109°C
 - b) 10 lb/inch² at 115°C
 - c) 15 lb/inch² at 121°C
 - d) 30 lb/inch² at 135°C
63. Name the carrier who has recovered from the disease but continues to harbor the pathogen in his body
- a) Healthy carrier
 - b) Temporary carrier
 - c) Convalescent carrier
 - d) Chronic carrier
64. Transmission of pathogens may occur during diagnostic or therapeutic procedures which is known as
- a) Contact
 - b) Inhalation
 - c) Iatrogenic transfer
 - d) Inoculation
65. The innate immunity of the body is maintained by the following external defense system except
- a) Skin
 - b) Mucous membrane
 - c) Body secretion
 - d) Injecting serum of actively immunized human or animal

66.Name the live attenuated vaccine from the following vaccine

- a) Cholera vaccine
- b) Salk vaccine from polio
- c) BCG
- d) Rabies

67.Which characteristic of following is not a characteristic of Neisseria

- a) Gram positive cocci
- b) Arranged in pairs
- c) Gram negative cocci
- d) Non sporing

68.Formula for estimating mean arterial pressure(MAP) is

- a) $MAP = (Systolic\ BP + 2Diastolic\ BP)/3$
- b) $MAP = (Systolic\ BP + 3Diastolic\ BP)/3$
- c) $MAP = (Systolic\ BP + Diastolic\ BP)/2$
- d) $MAP = (Systolic\ BP + Diastolic\ BP)/3$

69.In ECG, P wave represents

- a) Atrial depolarization
- b) Ventricular repolarization
- c) Ventricular depolarization
- d) Repolarization of purkinje fiber

70.In severe chronic liver dysfunction, there is deficiency of following vitamins except

- a) Vitamin A
- b) Thiamine
- c) Vitamin D3
- d) Vitamin C

71.The women older than 40 years of age develop which disease

- a) Pancreas disorder
- b) Cholesterol stones of gall bladder
- c) Liver disorder
- d) Stomach disorder

72. Which of the following is not included in risk factors for diabetes mellitus
- Family history of diabetes
 - Obesity BMI $\geq 27 \text{ kg/m}^2$
 - Normal level of LDL and HDL
 - Hypertension $\geq 140/90 \text{ mm/Hg}$
73. Which of the following is not a goal of therapeutic communication between nurse and client
- Develop trust
 - Provide information
 - Present judgmental opinion
 - Explore feelings
74. Mention the term of the following points which is not a non verbal skill of active listening
- Sit facing the client
 - Observe an open posture
 - Lean towards the client
 - Shifting of the eyes
75. Which of the following statement is not included in caring attitude of therapeutic communication
- Discourage questioning
 - Connect with the client
 - Respond to client needs
 - Empower the client
76. Mention the point which is excluded from branches of philosophy
- Metaphysics
 - Epistemology
 - Human psychology
 - Logic
77. Counselling includes following points except
- Someone seeking help
 - Someone willing to give help
 - Setting the permits to help and receive help
 - Incapable or untrained to help

78. Educational guidance viewed as an encompassing the objectives except
- a) Physical and mental health
 - b) Well-rounded social development
 - c) No use of leisure time
 - d) Mastery of fundamental school process
79. The principle which implies one may be final leader to take the ultimate decision. Mention that principle from the following statement
- a) Principle of specialism & the whole
 - b) Principle of morale
 - c) Principle of bureaucracy
 - d) Principle of oneness
80. The principle which implies fair rewards for work done must be offered to all members of organization. So name that one of Fayol's general principles of management
- a) Division of labour
 - b) Authority & responsibility
 - c) Unity of command
 - d) Remuneration of the team member
81. Which point of the following is not included in planning components
- a) Objectives
 - b) Primacy
 - c) Policies
 - d) Procedure
82. The rule or control of the higher to lower indicates which principle of organization
- a) Hierarchy
 - b) Centralization vs Decentralization
 - c) Unity of command
 - d) Delegation
83. Which of the following is not a scope under human resource department of manpower planning
- a) Supply analysis
 - b) Projecting future needs of the company
 - c) Labour market survey
 - d) Development of new techniques of survey

84. Name the tool for performance appraisal from the following statement in which there is narrative description of quality of overall performance
- Ranking
 - Checklist
 - Free response report
 - Graphic rating
85. The movement of the drug within the body is known as
- Pharmacodynamics
 - Pharmacy
 - Chemotherapy
 - Pharmacokinetics
86. The source of drug alkaloids is
- Mineral source
 - Animal source
 - Plant source
 - Microorganism
87. Mention the route of drug administration, where bioavailability of drug is 100%
- Intramuscular route
 - Intradermal route
 - Intravenous route
 - Subcutaneous route
88. Mention the example of oxidation reaction of following drugs
- Chloramphenicol
 - Esters
 - Phenytoin
 - Methadone
89. Indicate the term which tells about the ability of the drug to get bound to receptor is known as
- Intrinsic activity
 - Agonist
 - Affinity
 - Antagonist

90. Which of the following is the correct sequence of zygote

- a) Zygote - morula - blastocyst
- b) Zygote - blastocyst - morula
- c) Zygote - trophoblast - blastocyst
- d) Zygote - zonapellucida - blastocyst

91. Mention the day during which feto-placental circulation being started

- a) 13th day
- b) 10th day
- c) 21 - 22nd day
- d) 10 - 11th day

92. The proportion of the weight of placenta & weight of the foetus at term is being roughly

- a) 1: 5
- b) 1: 6
- c) 1: 4
- d) 1: 8

93. The infant can be placed on the toilet seat by the age of

- a) 15 -18 months
- b) 2 years
- c) 10 months
- d) 3 years

94. The causes of proportional short stature of children except

- a) Familial
- b) Constitutional delay in growth
- c) Rickets
- d) Genetic disorder

95. Which of the following statements is not include to ensure open airway in newborn

- a) Proper position of the infant
- b) Suction of mouth & then nose
- c) Tactile stimulation
- d) Endotracheal intubation & respiration in thick meconium

96. Name the following which is not a hormonal contraceptive for women
- a) Oral pill
 - b) Foam tablets, jelly & cream
 - c) Injectables (DMPA, NET-EN)
 - d) Subdermal implants
97. The Alma-Ata conference was held in which year stressed the need for health for all
- a) 1976
 - b) 1978
 - c) 1974
 - d) 1979
98. Mention the statement which is not a principle of home visiting
- a) Home visiting should be made according to the needs of the people
 - b) It should be a part of a planned visiting programme
 - c) The approach to the family should be judgmental
 - d) The health teaching should be scientifically sound.
99. Lateral curvature of spine is known as
- a) lordosis
 - b) kyphosis
 - c) scoliosis
 - d) osteomalacia
100. The synthesis of bile occurs in the
- a) liver
 - b) gall bladder
 - c) pancreas
 - d) Duodenum
101. Identify the clinical manifestation of duodenal ulcer among the following
- a) hematemesis will be present
 - b) patient generally malnourished
 - c) pain occurs 1-2 hrs after eating
 - d) food may relieve pain

102. Thiamine deficiency causes
 - a) Beriberi
 - b) Pellagra
 - c) Dermatitis
 - d) Scurvy
103. The optimum pH of carboxypeptidase is
 - a) 8
 - b) 9
 - c) 7.4
 - d) 4
104. Prophylactic administration of Vitamin A in a child is
 - a) health promotion
 - b) treatment
 - c) specific protection
 - d) rehabilitation
105. PMJAY (Pradhan Mantri Jan Arogya Yojana) was announced in the year 2018, by Govt. of India under the programme
 - a) Biju Swasthya Surakya Yojna
 - b) Ayushman Bharat programme
 - c) BSKY
 - d) RSBY
106. The prevalence of tuberculosis infection is measured by
 - a) chest x ray
 - b) sputum AFB
 - c) tuberculin test
 - d) sputum culture
107. The only vaccination for control measure of jungle yellow fever is
 - a) Polio
 - b) Vit A
 - c) BCG
 - d) 17 D Vaccine

108. The first nomenclature of pandemic corona virus by WHO is
- a) Covaccine-20
 - b) Corona
 - c) COVID- 19
 - d) COVID-19-20
109. Esophagogastroduodenoscopy examination is don for endoscopy of organs included
- a) esophagus stomach duodenum
 - b) only stomach and esophagus
 - c) duodenum and some parts of large intestine
 - d) onlyduodenum
110. Under Biomedical wastemanagement estimation, the quantity of total liquid waste per bed per day is
- a) 350lts
 - b) 700lts
 - c) 300-400lts
 - d) 200-250lts
111. Germ theory of disease was propounded by
- a) Darwin
 - b) Freud
 - c) Louis Pasteur
 - d) Erickson
112. The ethical principle that promotes client for self-determination is
- a) non- maleficence
 - b) autonomy
 - c) justice
 - d) fidelity
113. Fiber optic items are disinfected with
- a) 0.5% chlorine
 - b) 2% glutaraldehyde
 - c) 50-70% alcohol
 - d) Savlon

114. Gradual increase in rate and depth of respiration is known as
 - a) hyperventilation
 - b) hypoventilation
 - c) kussmaul respiration
 - d) chyne strokes breathing
115. Paralytic ileus may occur due to imbalanced electrolyte of
 - a) hyponatremia
 - b) hyperkalemia
 - c) hypocalcaemia
 - d) hypomagnesaemia
116. The amount of air remaining in the lungs after maximal expiration is called
 - a) Tidal volume
 - b) Supplemental air
 - c) Residual volume
 - d) Complemental air
117. The drug that is given with bismuth salt in case of helicobacter pylori infection
 - a) Antacid
 - b) Antibiotics
 - c) Analgesics
 - d) H2 receptor antagonists
118. Most effective way to determine the effectiveness of cpr is
 - a) Pulse
 - b) Papillary response
 - c) RR
 - d) Rhythm of heart
119. Compression of bleeding carotid artery leads to
 - a) Vomiting
 - b) Stroke
 - c) Blindness
 - d) Loss of sense of smell

120. Braden scale is used for assessing the risk for
 - a) Decubitus ulcer
 - b) Diabetes mellitus
 - c) Hypertension
 - d) Urinary tract infection

121. Complication of spinal anesthesia
 - a) Tachycardia
 - b) Hypotension
 - c) Hypertension
 - d) Dyspnea

122. Plaster of Paris (pop) is chemically
 - a) calcium carbonate
 - b) calcium sulphate
 - c) calcium phosphate
 - d) calcium magnate

123. Degree of resistance against a pathogen is known as
 - a) Immunity
 - b) Health
 - c) Risk Factor
 - d) Predisposition

124. Simplex Herpes virus infection is treated with
 - a) Stavudine
 - b) Ganciclovir
 - c) Acyclovir
 - d) Lamivudine

125. Temporary loss of muscle tone and weakness precipitated by a variety of emotional states is called
 - a) Cataplexy
 - b) Catharsis
 - c) Compulsion
 - d) Confabulation

126. The most effective form of somatic therapy for patients with schizophrenia is
- Minor tranquilizers
 - Electroconvulsive therapy
 - Major tranquilizer
 - Biofeedback
127. According to DSMIV the positive symptoms of schizophrenia includes
- hallucinations
 - delusions
 - flat affect
 - bizarre behavior
- A B C
 - B C D
 - A C D
 - A B D
128. A person seeing a design on the floor thought it was a fossil. Its an example of
- Illusion
 - Delusion
 - Hallucination
 - Idea of reference
129. Abnormal psychology is mainly the study of
- Normality of mind
 - Unconscious level of mind
 - Subconscious level of mind
 - Abnormality of mind
130. After ovulation corpus luteum formed in the ovary release
- Testosterone
 - Aldosterone
 - Progesterone
 - Estrogen

131. The measurement between one sacroiliac joint and the opposite iliopubic eminence
- a) Obstetric conjugate
 - b) Diagonal conjugate
 - c) Anatomical conjugate
 - d) Oblique diameter
132. The uterus has already risen out of pelvis and is experiencing further growth into the abdominal area at about
- a) 8th week of pregnancy
 - b) 10th week of pregnancy
 - c) 12th week of pregnancy
 - d) 18th week of pregnancy
133. Synonyms of obstetric grip is
- a) Leopold maneuvers
 - b) Fundal Grip
 - c) Umbilical Grip
 - d) Pawlik's Grip
134. Partograph is also known as
- a) Cervicograph
 - b) Uterograph
 - c) Ovariograph
 - d) Vaginograph
135. The failure of uterus to return to normal size is
- a) Involution
 - b) SubInvolution
 - c) Puerperium
 - d) Retraction
136. In an eclampsia women fluid intake should not be more than
- a) Previous 24 hrs urine output
 - b) Previous 24hr urine output + 1000ml
 - c) Total blood volume of the patient
 - d) 10ml/kg body weight

137. According to Erickson and psychosocial theory, what is the developmental task of a toddler
- a) Autonomy/shame and doubt
 - b) Trust/ mistrust
 - c) Industry/inferiority
 - d) Initiative/ guilt
138. The last neonatal reflex to emerge is
- a) Rooting reflex
 - b) Grasp reflex
 - c) Babinski reflex
 - d) Moro's reflex
139. The premature closure of the sagittal suture is called
- a) Scaphocephaly
 - b) Oxycephaly
 - c) Acrocephaly
 - d) Anencephaly
140. The father of modern management theory is
- a) Henry Fayol
 - b) Elton Mayo
 - c) M C Gregor
 - d) F W Taylor
141. Scalar chain denotes'
- a) Authority from the highest executive to the lowest one
 - b) A process of production
 - c) Technique for maintaining security in an organization
 - d) Scale to measure productivity
142. The style of leadership that dominates and commands the group is
- a) Democratic
